

SB Enterprise: Meta Ads Professional Playbook

B2B lead generation for window & door hardware: getting fabricators, builders, contractors, architects and distributors

Who this is for: the owner and sales team of SB Enterprise. **Goal:** use Meta (Facebook, Instagram, WhatsApp) to get **big, repeat B2B buyers**, not small one-time retail customers. **Assumptions:** you sell window/door hardware (rollers, locks, handles, hinges, fittings) in India and spend in ₹. Wherever you see **[X]**, put your real number. Never put fake numbers in ads. **Note:** Meta changes button names and menus often. If a menu name here doesn't match exactly, look for the closest option. The strategy stays the same.

Table of contents

1. The core rules that make B2B Meta Ads work
 2. Infrastructure setup (do this once, properly)
 3. Tracking & data: Pixel, Conversions API, UTMs, CRM feedback
 4. Account & campaign architecture
 5. Budget math & bidding
 6. Audience strategy (advanced)
 7. Lead form engineering: filtering for big buyers
 8. Click-to-WhatsApp system
 9. Offer engineering for big buyers
 10. Creative system: angles, hooks, formats, testing
 11. Ready-to-use ad copy bank
 12. Video scripts & shot lists
 13. Full-funnel & retargeting sequences
 14. Account-Based Marketing (ABM) for named big accounts
 15. Speed-to-lead & sales process
 16. Lead scoring system
 17. Measurement: KPIs, unit economics, dashboard
 18. Optimization rules: daily, weekly, monthly
 19. Scaling playbook
 20. Account safety & policy
 21. Other channels that multiply Meta results
 22. 90-day roadmap with budgets
 23. Templates & checklists
-

1. The core rules

These ten rules matter more than any setting.

1. **Creative is the new targeting.** Meta's algorithm decides who sees your ad mostly from **what the ad says and shows**. An ad showing a warehouse full of stock, truck dispatch and "for bulk/project orders" will be shown to business buyers. An ad saying "cheap price" will be shown to bargain hunters.
 2. **Optimize for the event you actually want.** If you optimize for "any lead", Meta finds people who fill forms easily (often low quality). Send Meta signals of **qualified leads and sales** (Section 3), so it learns who your *real* buyers are.
 3. **Add friction on purpose.** For B2B, a slightly harder form gives **fewer, much better leads**. A cheap lead is not the goal; a cheap **customer** is.
 4. **Consolidate, don't fragment.** Few campaigns, few ad sets, enough budget each. Ten tiny ad sets at ₹200/day each never exit the learning phase.
 5. **Speed-to-lead beats everything.** A B2B lead called within 5 minutes converts far better than one called next day. Ads only open the door.
 6. **Judge on the right timeline.** B2B sales take 2-12 weeks. Judge ads on **cost per qualified lead weekly** and on **revenue monthly/quarterly**, not on likes or clicks.
 7. **Volume of creative testing = growth.** Accounts that grow launch **3-5 new creatives every week**. Most fail; a few winners pay for everything.
 8. **Proof beats claims.** "Tested 50,000 cycles" with a video > "Best quality".
 9. **Your data is your moat.** Customer lists, lead stages and video viewers become audiences competitors can't copy.
 10. **Meta is one part of the system.** Meta creates demand and leads. Google Search captures ready buyers. LinkedIn and personal sales close big accounts.
-

2. Infrastructure setup

2.1 Business assets checklist (professional level)

Asset	Setting / detail	Why it matters
Meta Business Portfolio (business.facebook.com)	Legal business name exactly as on GST	Needed for verification
Business verification	Security Center → Start verification → GST certificate / utility bill / bank document with same name & address	Higher trust, fewer restrictions, access to more features (e.g., WhatsApp API)
2 admins minimum	Owner + one trusted person, both with 2-factor authentication	If one profile gets locked, you don't lose the business
Ad account	Currency INR , time zone Asia/Kolkata . <i>These can't be changed later</i>	Correct reporting & billing
Backup ad account	Create a second ad account inside the portfolio, keep it idle	If main account gets restricted, you don't stop
Payment	Card/UPI + backup card. For larger spends, consider prepaid funds	Failed payment = ads stop = learning reset
Facebook Page	Category: "Hardware Store" / "Industrial Company" / "Building Materials". Complete About, phone, WhatsApp, address, website, hours	Buyers check your Page before calling
Instagram Professional account	Linked to the Page in Business Settings → Accounts	Instagram placements + DMs
WhatsApp Business	App for small scale; WhatsApp Business Platform (API) via a provider (e.g., Interakt, WATI, AiSensy, Gupshup) for automation	Auto-replies, tagging, conversion feedback to Meta
Domain verification	Brand Safety → Domains (if you have a website)	Control of link previews and events
Pixel / Dataset	Events Manager → Connect data source → Web	Website tracking + retargeting
Conversions API	See Section 3	Accurate tracking + lead quality feedback
Lead CRM	Google Sheet to start; later a real CRM (Zoho CRM, LeadSquared, HubSpot, Pipedrive, etc.)	Track lead stage, send stages back to Meta

2.2 Page "trust layer" before spending a rupee

A big buyer will open your Page after seeing an ad. Make sure they see:

- **Pinned post:** company intro video (owner on camera, 45–60 sec).
- **Highlights on Instagram:** Products · Factory/Warehouse · Dispatch · Projects · Tests · Clients · Catalog.
- **At least 12 posts** covering products, tests, dispatch, projects, team.
- **Reviews/recommendations** from 10+ real customers (ask fabricators who like you).
- **Same logo, colours, phone number** everywhere: Page, Instagram, WhatsApp, visiting card, packaging.

2.3 Sales assets you must have ready (big buyers will ask)

- ☐ **Company profile PDF** (4–8 pages): about, years, capacity, warehouse, range, clients/projects, certifications, contact.
 - ☐ **Full catalog PDF** with codes, sizes, finishes, materials, load ratings.
 - ☐ **Project price list** with volume slabs (e.g., up to 1,000 units / 1,000–5,000 / 5,000+).
 - ☐ **Test reports / warranty letter / material certificates** (whatever you genuinely have).
 - ☐ **Sample kit box**: 8–12 best products, branded box, catalog + visiting card inside.
 - ☐ **Case studies**: 3 short stories: "Builder X, 400 flats, supplied [X] units in [Y] days."
 - ☐ **GST, PAN, bank details, cancelled cheque**: the "vendor registration pack" builders' procurement teams ask for.
-

3. Tracking & data

This is the **professional difference**. Most small businesses skip it and get junk leads.

3.1 Naming convention (use from day 1)

```
CAMPAIGN: SB | {Objective} | {Funnel} | {Audience type} | {Geo} | {MMYY}
          SB | LEADS | BOFU | PROSPECTING | GUJ+MH | 1026

AD SET:   {Audience} | {Placement} | {Optimization} | {Budget type}
          BROAD-ADV+ | AUTO-NO-AN | LEADS | CBO

AD:       {Date} | {Angle} | {Format} | {Hook ID} | {Version}
          2610 | SCALE | VID-9x16 | H07 | v2
```

Why: when you have 60 ads, you instantly know which **angle** and **hook** wins.

3.2 UTM parameters (for website traffic ads)

In the Ad → **URL parameters** field, paste:

```
utm_source=meta&utm_medium=paid_social&utm_campaign={{campaign.name}}&utm_content=
{{ad.name}}&utm_term={{adset.name}}&placement={{placement}}
```

Meta fills the `{{ }}` values automatically. In Google Analytics/your website forms, you'll see exactly which ad brought each enquiry.

3.3 WhatsApp source tracking (simple but powerful)

Give each ad a **pre-filled message with a code**:

- Ad H07 scale video → pre-filled text: Hi SB Enterprise, I want bulk price list. (Ref: M-H07)
- Ad H03 test video → ... (Ref: M-H03)

Your team records the Ref in the CRM. Now you know **which ad brings orders**, not just chats.

3.4 Pixel + Conversions API (CAPI)

- **Pixel** = browser tracking. Gets blocked by ad blockers, iOS privacy, etc.
- **Conversions API** = your server/CRM sends events directly to Meta. More reliable.
- Set up both, with **deduplication** (same `event_id` on both), so Meta doesn't double count.
- Easiest routes: website builder integrations (Shopify, WordPress plugins), Google Tag Manager server-side, or partners in **Events Manager** → **Partner integrations**.
- Check **Event Match Quality** in Events Manager. Aim for "Good" or better by sending hashed email + phone + name + city.

Website events to track:

Event	When
PageView	Every page
ViewContent	Product/category page

Event	When
Contact	Click on call / WhatsApp button
Lead	Enquiry form submitted
DownloadCatalog (custom)	Catalog PDF downloaded
SubmitApplication	Dealer / vendor registration form submitted

3.5 The big one: send lead stages back to Meta (CRM feedback loop)

This is what makes Meta find **big buyers** instead of form-fillers.

How it works:

1. Lead comes from an Instant Form (Meta gives it a `lead_id`).
2. Your team updates the stage in CRM: New → Contacted → Qualified (A/B) → Sample sent → Quote sent → Won .
3. CRM sends each stage change back to Meta via **Conversions API for CRM** (Events Manager → Connect data → CRM; many CRMs and tools like Zapier/Make/LeadsBridge have connectors).
4. In your campaign, choose optimization "**Conversion leads**" (available once data flows), and pick your quality stage (e.g., `Qualified`) as the target.
5. Meta now optimizes toward people who look like **qualified buyers**, not form-fillers.

Requirements (approximate, check Meta's current guidance):

- Consistent volume, roughly **200+ leads per month** recommended.
- Upload stage updates **at least daily**.
- Target stage should be reached by a meaningful share of leads (not 0.1%, not 90%).

Before you have that volume: still record stages in a sheet. Every month, upload your **Qualified + Won** leads as a Custom Audience and build Lookalikes from them (Section 6).

3.6 Same feedback for WhatsApp (advanced)

If you use the **WhatsApp Business Platform (API)**, click-to-WhatsApp chats carry an ad referral ID. Your WhatsApp provider can send events like `LeadSubmitted` / `Purchase` back to Meta through **Conversions API for Business Messaging**. Then you can optimize WhatsApp campaigns for **qualified conversations or purchases**, not just "conversations started". Ask your WhatsApp API provider for "CTWA conversion tracking / CAPI".

4. Account & campaign architecture

4.1 Recommended structure (lean & professional)

CAMPAIGN 1: SB | LEADS | PROSPECTING (60–70% of budget)
Advantage campaign budget (CBO) ON
└ Ad set A: BROAD (Advantage+ audience, geo + age only, with suggestions)
└ Ad set B: INTEREST STACK (construction / fenestration / architecture / business owners)
└ Ad set C: LOOKALIKE 1–3% (best customers / qualified leads)
Each ad set: same 4–6 best ads

CAMPAIGN 2: SB | LEADS/MESSAGES | RETARGETING (15–20% of budget)
└ Ad set: Video viewers 50%+ (90 days) + IG/FB engagers (180 days)
└ + lead form openers who did not submit + website visitors (30 days)
└ EXCLUDE: leads already submitted (30 days), existing customers
└ Ads: proof-heavy: case studies, factory tour, testimonials, offer

CAMPAIGN 3: SB | TESTING | CREATIVE (10–20% of budget)
Ad set budgets (ABO), one ad set per new concept
└ Winners graduate to Campaign 1 (copy the post ID, keep social proof)

CAMPAIGN 4 (optional): SB | REACH/THRUPLAY | TOFU-VIDEO (cheap reach)
└ Builds video-viewer pools in target cities for Campaign 2

4.2 Why this structure

- **Consolidation** gives each ad set enough conversions to exit learning (~50 optimization events/week per ad set).
- **Testing separated** from scaling, so a bad test doesn't hurt winning ads.
- **Retargeting separate**: warm audiences convert cheaper; they need different messages.

4.3 Key settings

Setting	Recommended	Reason
Objective	Leads (Instant Form) for B2B quality; Engagement → Messages (WhatsApp) for dealer volume	Meta optimizes for the objective
Placements	Advantage+ placements with Audience Network excluded , or manual: FB/IG Feed, Reels, Stories, (optional) Explore, Marketplace	Audience Network = accidental clicks, junk leads
Attribution	7-day click, 1-day view (default) for optimization; also look at 1-day click in reporting	Shows real impact
Advantage+ creative enhancements	Review each. Keep: brightness/contrast, text improvements (test). Turn off : AI image generation/expansion/backgrounds that change product appearance	Product must look exactly real for B2B trust
Multi-advertiser ads	Off (optional)	Avoids your ad shown next to competitors
Language	Leave open, unless running regional-language creative	Many Indian users have English set
Dynamic creative / Flexible format	Use in testing campaign to test 3 texts × 2 headlines	Finds winning combinations faster

5. Budget math & bidding

5.1 Minimum budget formula

To exit learning, an ad set needs ~**50 optimization events per week**.

Minimum daily budget per ad set $\approx (\text{Target cost per lead} \times 50) \div 7$

Example: target CPL ₹250 $\rightarrow (250 \times 50) \div 7 \approx$ **₹1,800/day per ad set**.

If you can't afford that: **use fewer ad sets** (put everything in 1-2), or optimize for a cheaper upper-funnel event at first. It's fine to stay in "Learning limited" with a small budget, but don't split it further.

5.2 Suggested monthly budgets (estimates; adjust to your numbers)

Stage	Monthly spend	Structure
Start / test	₹25,000–40,000	1 prospecting campaign (1–2 ad sets) + small retargeting
Grow	₹60,000–1,50,000	Full structure from 4.1 + 3–5 new creatives/week
Scale	₹2,00,000+	Add new states, conversion-leads optimization, Advantage+ leads campaigns (if available), more creative volume

5.3 Bidding

Strategy	When to use
Highest volume (lowest cost)	Start here. Let Meta learn.
Cost per result goal (cost cap)	Once you know your real CPL. Set it ~10–20% above your average to control cost while scaling.
Bid cap	Advanced only; strict control, can stop delivery.

5.4 Budget change rules

- Change budgets by **≤20% at a time**, max once every **2–3 days**, to avoid resetting learning.
- For big jumps, **duplicate** the winning ad set/campaign with the higher budget instead of editing.
- Never pause a winning ad set for days and restart; performance often drops.

6. Audience strategy

6.1 Prospecting audiences (cold)

Audience	How to build	Notes
Broad / Advantage+ audience	Geo + age 24-60 only, add "audience suggestions" (interests below)	Often the best performer once creative is strongly B2B. Let creative do the filtering.
Interest stack	Interests (OR): <i>Construction, Building materials, Civil engineering, Real estate development, Architecture, Interior design, Aluminium, Window, Glass, Fenestration, Hardware</i> ; AND narrow by behaviour: <i>Small business owners / Facebook Page admins</i> (if available)	Test with/without the AND-narrowing
Lookalike: best customers	Upload top 50-200 customers (phone/email). Use a value-based list (add a "value" column = yearly purchase ₹). Create 1%, 1-3%, 3-5% India	Best way to find more big buyers
Lookalike: qualified leads	Monthly upload of A/B leads + Won	Gets better every month
Lookalike: engaged video viewers 95%	From your best B2B videos	Good when customer list is small
Geo-pin audiences	Drop pins with 10-25 km radius on industrial areas, aluminium/uPVC fabrication clusters, building-material markets, fast-growing real estate zones	Reaches fabricators/contractors physically there

Exclusions (always):

- Existing customers (customer list), unless running an upsell campaign.
- Leads submitted in last 30 days (so you don't pay twice).
- Your own employees (upload their numbers).

6.2 Retargeting audiences (warm)

Audience	Window
Video viewers 50% / 75% / 95%	30 / 90 / 180 days
Instagram account engagers	90 / 365 days
Facebook Page engagers	90 / 365 days
Instant form: opened but not submitted	30 / 90 days (very valuable: interested but hesitant)
Messaged your Page / WhatsApp	90 days
Website: catalog/contact page visitors	30 / 90 days
Website: top 25% time spent	30 days
CRM: "Quote sent but not won" (customer list)	Upload weekly

6.3 Geographic strategy for big buyers

- **Phase 1:** your home state + where you already deliver well (fast service = your advantage).

- **Phase 2:** 3–5 cities with heavy real-estate construction (check new project launches, RERA registrations in that city).
- **Phase 3:** states where you can appoint **distributors** (a distributor campaign, Section 9).
- Split ad sets by geo **only** when the message/offer differs (e.g., regional language), otherwise keep together.

6.4 Audience size guidance

- Prospecting: ≥ 10 lakh people for broad; ≥ 2 lakh for interest/LAL.
 - Retargeting: can be small (thousands), but needs $\geq \sim 1,000$ to deliver well.
-

7. Lead form engineering

The Instant Form is your **quality filter**. Build it like this.

7.1 Form settings

- **Form type: Higher intent** (adds a review screen before submit → fewer accidental leads). Use phone verification if offered in your account.
- **Intro / context card:**
 - Headline: Bulk & Project Supply: Window & Door Hardware
 - Paragraph (or bullets):
 - For fabricators, builders, contractors & dealers
 - [X]+ SKUs in stock · Dispatch in [X] hrs · GST invoice
 - Minimum project order: ₹[X] ← **this line filters small buyers**
 - Image: warehouse/dispatch photo.

7.2 Questions (in this order)

1. **Full name** (prefilled)
2. **Phone number** (prefilled)
3. **Company / firm name** (short answer, custom, adds healthy friction)
4. **City** (prefilled or short answer)
5. **You are a:** (multiple choice)
 - Aluminium / uPVC window fabricator
 - Builder / Developer
 - Contractor
 - Architect / Interior designer
 - Dealer / Distributor
 - Homeowner / Individual
6. **Monthly / project hardware requirement:**
 - Below ₹50,000
 - ₹50,000 – ₹2 lakh
 - ₹2 lakh – ₹10 lakh
 - Above ₹10 lakh
7. **What do you need now?**
 - Price list for bulk order
 - Quote for a specific project (BOQ)
 - Sample kit
 - Dealership / distributorship
8. **When do you need supply?** Immediately / within 1 month / 1–3 months / just exploring
9. **GST number** (short answer, optional)

Conditional logic (if available in your form editor): if "Homeowner" → skip to end with a message "Thank you! Our dealer near you will contact you." (they still become C leads).

7.3 Completion screen

- Headline: Thank you, our project team will call you within 10 minutes (10am–7pm).

- Button: **WhatsApp us now** (link: <https://wa.me/91XXXXXXXXXX?text=Hi%20SB%20Enterprise%2C%20I%20just%20submitted%20the%20form>) or **Download catalog**.

7.4 Lead delivery (never download manually once a day)

- Connect forms to a **CRM or Google Sheet in real time** (Meta native CRM integrations, Zapier, Make, Pabbly Connect, LeadsBridge).
- Trigger **instant WhatsApp/SMS** to the lead ("Thanks [Name], [Sales person] will call you in 10 minutes. Here's our catalog: [link]").
- Trigger **instant alert** to sales person's phone (WhatsApp group or CRM app notification).

7.5 Form A/B tests to run

- Higher intent vs More volume.
 - With vs without "Minimum project order ₹X".
 - With vs without GST question. Track **cost per qualified lead**, not cost per lead.
-

8. Click-to-WhatsApp system

Best for **dealers, fabricators and repeat buyers** who prefer chatting.

8.1 Setup

- Objective: **Engagement** (or Leads/Sales with "Messaging apps" conversion location) → **WhatsApp**.
- Pre-filled message with Ref code (Section 3.3).
- **Ice-breakers / quick reply buttons** (if using templates):
 - Bulk price list
 - Project quote (B0Q)
 - Become a dealer
 - Request sample kit

8.2 Qualification flow (WhatsApp API bot or manual script)

Bot: Welcome to SB Enterprise 🖐️ Window & door hardware for fabricators, builders & dealers. Please choose:

1 Bulk price list **2** Project quote **3** Dealership **4** Sample kit

Bot: Great! Which best describes you?

Fabricator / Builder / Contractor / Architect / Dealer / Individual

Bot: Approx monthly requirement?

<₹50k / ₹50k–2L / ₹2L–10L / ₹10L+

Bot: City?

→ If ₹2L+ or Builder/Dealer: "Thank you! [Name], our senior manager, will call you within 10 minutes." + instant alert to owner.

→ Else: send catalog PDF + price list + "Reply CALL for a callback."

8.3 WhatsApp tricks

- **Labels/tags:** A-lead, B-lead, C-lead, Sample sent, Quote sent, Won, plus the ad Ref.
 - **Broadcast (with opt-in)** every 7–10 days to warm leads: new product, dispatch photos, project stories. Don't spam.
 - **Catalog in WhatsApp Business** with codes and photos (no public price for project items; "Price on request" for bulk).
 - **Reply time** is shown to users. Keep it fast.
-

9. Offer engineering

Big buyers don't respond to "10% off". They respond to **reduced risk and saved effort**.

Offer	Target	Why it works
"Send your BOQ / window schedule → detailed quote in 24 hours"	Builders, contractors	Saves their procurement time; you get exact project size
Free sample kit for verified fabricators/builders (gated: GST + requirement ≥ ₹X)	Fabricators, architects	Physical product = trust. Gating keeps cost in control
Trial order pricing on first order ≥ ₹[X]	Fabricators	Removes risk of switching suppliers
Dedicated account manager + priority dispatch	Large fabricators, builders	Big buyers fear delays more than price
Credit terms after [X] orders (only if you can)	Repeat buyers	Major decision factor in B2B India
Dealer / distributor program: territory, margin, marketing support	Dealers in other cities	Scales your reach without your own sales team
Spec support for architects: spec sheets, CAD/BIM-friendly drawings, samples	Architects/designers	Gets you specified into projects → bulk orders later
Private label / custom finish (if you can)	OEMs, window system brands	Huge repeat volumes
Factory/warehouse visit invitation	Builders' procurement	Seeing scale = trust

Rule: every ad has **one** clear offer + **one** clear action.

10. Creative system

10.1 Angles (the "why buy" message)

Test angles, not just designs. Each angle → 2–3 creatives.

Code	Angle	Core message	Best for
A1	Pain: callbacks	"Every failed roller = a site revisit and an angry customer."	Fabricators
A2	Proof: testing	"50,000 open-close cycles. Still smooth." (only real test numbers)	Fabricators, architects
A3	Scale: stock	"[X] SKUs, [X] lakh units in stock. No waiting."	Builders, big fabricators
A4	Speed: dispatch	"Order by 2 pm, dispatch same day." (if true)	Contractors
A5	Economics	"Hardware is 3% of window cost but 80% of complaints."	Fabricators, builders
A6	Authority: projects	"Supplied to [X] projects / [X] flats across [state]."	Builders
A7	Founder trust	Owner on camera: years in business, promise, phone number	All, especially big accounts
A8	Comparison	Cheap vs SB side-by-side test	Fabricators
A9	Partner / dealer	"Become SB distributor in your city: [X]% margins, territory protection"	Dealers
A10	Offer	"Send BOQ → quote in 24 hrs" / "Free sample kit for verified fabricators"	All B2B

10.2 Formats that work for B2B hardware

1. **Vertical video 9:16, 15–40 sec** (Reels/Stories): demos, tests, warehouse, dispatch.
2. **Founder/sales-head talking head** with B-roll cutaways.
3. **Customer testimonial** (a fabricator or builder on site, phone-shot, honest). The strongest format.
4. **Carousel**: one product family per card → last card "Get bulk price list".
5. **Static "spec card"**: product macro photo + 3–4 hard specs (material, finish, load, cycles) + "Bulk/project orders".
6. **Before/after site photos**: old failed hardware vs new installed SB hardware.
7. **Collection/Instant Experience** (optional): mini catalog inside Facebook.

10.3 Production rules (professional)

- **Hook in first 1–2 seconds**: movement, sound, bold claim, or a surprising visual (weight crushing a roller, 1,000 boxes on a truck).
- **On-screen captions always**. Burned-in subtitles in English/Hinglish.
- **Show the product in the hand / on the window**, not floating on white.
- **Real people, real locations** (factory, warehouse, site). Over-polished = looks like a retail brand ad.
- **Logo** small in a corner throughout, not as an intro.
- **Safe zones for 9:16**: keep text out of top ~14% and bottom ~20% (UI covers it).
- **Provide 3 aspect ratios**: 9:16 (Reels/Stories), 4:5 (Feed), 1:1 (backup). Use asset customization per placement.
- **Length**: 15–30 sec for cold; 45–90 sec okay for retargeting (case study, factory tour).

- **Sound:** trending/neutral music low + voiceover. Many watch muted, so text must carry the message alone.
- **AI product images:** use your product-scene-prompt skill to place real product photos into premium window scenes. Keep the product 100% accurate.

10.4 Hook bank (first line on screen / first words spoken)

ID	Hook
H01	"Fabricators, stop losing money on site revisits."
H02	"This roller carried [X] kg for [X] cycles. Watch."
H03	"Why do sliding windows fail in 6 months? It's not the profile."
H04	"₹10 saved on a roller = ₹1,000 lost on a complaint."
H05	"This is what [X] lakh units of stock looks like."
H06	"Builders: one call, full hardware for your entire project."
H07	"Today's dispatch: [X] boxes to [City]."
H08	"Cheap vs ours: same price per window, different life."
H09	"I've been supplying window hardware for [X] years. Here's my promise."
H10	"Looking for a hardware distributor in your city? We're appointing."
H11	"Send us your BOQ. Quote in 24 hours."
H12	"Architects: get our spec sheet and free sample kit."

10.5 Creative testing method

Setup (Testing campaign, ABO):

- 1 ad set per **concept/angle**, same audience (broad), budget ~₹500–1,000/day each.
- Inside: 3 creatives (different hooks/visuals) + 2 primary texts + 2 headlines (flexible/dynamic format). This is the "3-2-2" method.
- Run **5-7 days** or until each creative spent $\approx 3\times$ **your target CPL**.

Kill / keep rules:

Signal after $\sim 3\times$ target CPL spend	Action
0 leads	Kill
CPL $> 2\times$ target	Kill
CPL near target, but leads mostly C quality	Kill or rework message to be more B2B
CPL $\leq$ target AND $\geq 30\%$ A/B leads	Winner → move to Prospecting campaign (use same post ID to keep likes/comments)
Hook rate (3-sec views $\div$ impressions) $< 20\%$	Hook problem → new first 2 sec
Hook rate good, but low hold/CTR	Body/offer problem → change middle/CTA

Iteration: for every winner, make **3 variations** (new hook, new first visual, new person) → keeps fatigue away.

10.6 Creative fatigue signals

- Frequency > **3-4** in 7 days (prospecting).
- CTR falls **30%+** from its first-week average.
- CPL rises 30%+ for 3+ days with same budget. → Refresh with new hooks/visuals; keep the winning **angle**.

10.7 Creative production cadence

- **Weekly:** 3-5 new ads (1 shoot day / month can give 20+ clips).
 - **Monthly shoot list:** 2 tests, 2 dispatch, 1 warehouse, 1 founder, 1-2 testimonials, 2 installation, 1 project walkthrough.
-

11. Ad copy bank

Replace [X] with real numbers only. Keep claims true and provable.

Copy 1: Fabricators (Pain + Proof), English

Primary text:

Fabricators: one failed roller costs you a site revisit, a ₹1,000+ loss and an unhappy customer. SB Enterprise heavy-duty hardware is tested for [X] cycles and [X] kg load. ✓ [X]+ SKUs ready in stock ✓ Dispatch within [X] hours ✓ GST invoice · project pricing
For bulk & project orders only. Tap *Get Quote* for the bulk price list.

Headline: Heavy-Duty Window Hardware: Bulk Price List **Description:** Tested · In Stock · Fast Dispatch
CTA button: Get Quote

Copy 2: Builders (Scale + Offer)

Builders & developers: get complete window & door hardware for your project from one supplier.
📋 Send your BOQ/window schedule → detailed quote in 24 hours 🏗️ Supplied to [X]+ projects across [State] 🚚 Scheduled phase-wise delivery to site 👤 Dedicated project manager
Tap *Get Quote* to share your project details.

Headline: Project Supply: Quote in 24 Hours **CTA:** Get Quote

Copy 3: Hinglish (Fabricators)

Fabricator bhai, sasta roller = baar baar complaint, baar baar site visit. ✗
SB Enterprise ka heavy-duty hardware: [X] cycles tested, [X] kg load. ✓ 📦 [X]+ products stock mein ready 🚚 [X] ghante mein dispatch 📄 GST bill, bulk rate
Sirf bulk / project order ke liye. Price list ke liye *Get Quote* dabaiye.

Headline: Bulk Rate Price List: Window Hardware **CTA:** Get Quote / Send WhatsApp Message

Copy 4: Dealers / Distributors

Hardware dealers: add a fast-moving window & door hardware range to your shop.
💰 Strong dealer margins 🗺️ Territory protection for distributors 📦 Ready stock + fast replenishment 📣 Marketing support: catalogs, display, digital ads in your area
We're appointing distributors in [City/State]. Tap *Apply Now*.

Headline: Become SB Enterprise Distributor **CTA:** Apply Now

Copy 5: Architects / Designers

Architects & interior designers: specify hardware that matches your design and lasts.

🎨 Finishes: [list your finishes] 📐 Spec sheets & technical drawings 📦 Free sample kit for practicing architects

Tap *Learn More* to request the spec pack.

Headline: Free Spec Pack + Sample Kit **CTA:** Learn More

Copy 6: Retargeting (Founder trust)

You checked out SB Enterprise. Here's why [X]+ fabricators and builders trust us:

"[Short real customer quote]" - [Name], [Company], [City]

[X] years · [X] SKUs · [X] projects supplied Talk to us directly on WhatsApp. No middlemen.

CTA: Send WhatsApp Message

Copy 7: Retargeting (Form opened, not submitted)

Still comparing hardware suppliers? Send us your requirement. We'll send a quote + free sample (for verified fabricators/builders) within 24 hours. No obligation.

CTA: Get Quote

12. Video scripts

Script V1: "Strength test" (Fabricators), 20 sec

Time	Visual	On-screen text / VO
0-2s	Heavy weight placed on roller; close-up	"Can your roller take [X] kg?"
2-8s	Machine/hand cycling the sliding sash fast; counter visible	"[X] cycles. Still smooth."
8-13s	Side-by-side: cheap roller wobbling vs SB smooth	"Cheap rollers = callbacks."
13-17s	Warehouse racks, boxes	"[X]+ SKUs in stock · Dispatch in [X] hrs"
17-20s	Logo + phone, "For bulk/project orders"	"Tap Get Quote for bulk price list"

Script V2: "Warehouse scale" (Builders), 25 sec

Time	Visual	Text / VO
0-2s	Fast walk into warehouse, wide shot	"This is what [X] lakh units of stock looks like."
2-10s	Racks, labelled bins, staff packing	"Every fitting your project needs, under one roof."
10-16s	Truck loading, invoice/challan stamped	"Phase-wise delivery to your site."
16-22s	Finished building with windows	"Supplied to [X]+ projects across [State]."
22-25s	CTA card	"Send your BOQ → quote in 24 hours."

Script V3: "Founder promise", 40 sec

- **0-3s:** Owner in warehouse: "I'm [Name], founder of SB Enterprise. For [X] years, we've supplied window hardware to fabricators and builders."
- **3-15s:** "The biggest problem I hear: hardware fails, the fabricator gets blamed. So we test every batch for [X]." (B-roll testing)
- **15-28s:** "We keep [X]+ products in stock so your project never waits." (B-roll racks, dispatch)
- **28-40s:** "If you're a fabricator, builder or dealer, send me your requirement. My team will call you within 10 minutes." (CTA card)

Script V4: "Customer testimonial", 30 sec

- Fabricator on their shop floor or site: name, firm, city.
- Questions to ask on camera: *What problem did you have before? Why did you switch? What changed (complaints, speed, profit)? Would you recommend us?*
- End with SB CTA card. Get written permission to use their name/face.

Script V5: "Dispatch of the day" (series, weekly), 10-15 sec

- "Today's dispatch: [X] boxes to [City] for [type of project]." Truck loading time-lapse. Builds proof of scale continuously; cheap to make every week.

Shot list for one monthly shoot day

- ☐ 10 product macro shots (each family, each finish)
- ☐ 3 strength/durability tests

- ☐ 1 cheap-vs-SB comparison
 - ☐ Warehouse walk (wide + details)
 - ☐ Packing & dispatch, truck loading time-lapse
 - ☐ Installation on a real window (fabricator)
 - ☐ Founder: 4-5 talking segments
 - ☐ 1-2 customer testimonials
 - ☐ Finished project exterior/interior
 - ☐ Team photos (sales, warehouse)
-

13. Full-funnel & retargeting

13.1 Funnel map

TOFU (cold, cheap reach)	MOFU (warm, build trust)	BOFU (hot, ask for action)
Test/strength videos Warehouse/dispatch reels → Educational: "why rollers fail" content Optimize: ThruPlay / Reach	Case studies, testimonials Factory tour, founder video → Spec sheets, comparisons Optimize: Leads / Engagement	Lead form: Get Quote / BOQ WhatsApp: price list Sample kit offer Dealer application Optimize: Leads / Conv. leads

13.2 Retargeting sequence (by days since first engagement)

Days	Message	Format
0-3	Offer: "Get bulk price list / BOQ quote"	Lead form ad
4-10	Proof: testimonial or project case study	Video
11-20	Founder trust + direct WhatsApp	Video / CTWA
21-45	Sample kit offer / factory visit invitation	Static + lead form
45-90	New products, dispatch reels (stay top-of-mind)	Reels

Build with audience windows (e.g., video viewers 0-7 days, minus 0-3; etc.) or keep it simple: one retargeting ad set with 4-6 ads of different stages and let Meta rotate.

13.3 Frequency control

- Retargeting frequency up to **6-10/week** is okay for small warm B2B audiences, but refresh creatives every 2-3 weeks.

14. Account-Based Marketing

For **named big targets**, e.g., the top 50 builders, top 100 fabricators, top 30 window system companies in your region.

1. **Build a target list** (spreadsheet): company, decision maker, phone, email, city, project pipeline.
Sources: RERA project registrations, builder association member lists, IndiaMART, Justdial, LinkedIn, exhibitor lists, your sales team.
2. **Upload as a Custom Audience** (phones + emails of owners, purchase heads, project managers).
Even a partial match helps; small audiences may deliver slowly, so combine with lookalikes.
3. **Run a dedicated "ABM" campaign** with high frequency: case studies, founder video, project capability, "visit our warehouse".
4. **Coordinate with outbound:** the sales person calls/WhatsApps the same accounts that week ("You may have seen our videos...").
5. **Same list on LinkedIn** (Matched Audiences) for procurement heads.
6. **Track per account:** touched / meeting / sample / quote / won.

This "surround sound" (ads + calls + WhatsApp + visit) is how small suppliers win big accounts.

15. Speed-to-lead & sales process

15.1 SLAs (write these on the wall)

Lead type	First contact	Owner
A lead (Builder/Dealer or ₹2L+/month)	≤ 5 minutes (call)	Senior sales / owner
B lead (₹50k-2L)	≤ 30 minutes	Sales executive
C lead (small/homeowner)	Same day (WhatsApp catalog + dealer referral)	Junior / automation
After-hours leads	Auto WhatsApp instantly, call first thing next morning (before 10 am)	Automation + sales

15.2 First call script (2-4 minutes)

1. **Open:** "Hello [Name], this is [You] from SB Enterprise. You requested our bulk price list a few minutes ago, is this a good time for 2 minutes?"
2. **Qualify (BANT-lite):**
 - "What do you mainly make / build?"
 - "Roughly how many windows/doors per month or in this project?"
 - "Which hardware are you using now? What problems do you face?"
 - "Who decides on hardware purchases?"
 - "When is your next requirement?"
3. **Position:** match 1-2 strengths to their pain (stock, testing, dispatch, credit).
4. **Next step (always one):** sample kit / BOQ quote / visit / trial order.
5. **Send immediately on WhatsApp:** company profile, catalog, relevant case study.

15.3 Follow-up cadence (don't stop at one call)

Day	Action
0	Call + WhatsApp catalog/profile
1	WhatsApp: relevant test video / case study
3	Call: confirm sample kit / BOQ
7	WhatsApp: testimonial + "any questions?"
14	Call: quote follow-up / visit proposal
30	WhatsApp: new product / dispatch reel
Monthly	Stay in touch until they buy or say no

15.4 Converting big accounts

- **Sample kit → site/factory visit → trial order → flawless delivery → regular orders → credit terms → annual rate contract.**
- After the first order: **call to check satisfaction**, fix any issue fast, ask for **testimonial + referral**.
- Offer **annual rate contracts** for builders and large fabricators (price stability is valuable to them).

16. Lead scoring

Score every lead in the CRM/Sheet (0-100):

Factor	Points
Business type: Builder/Developer, Distributor, Window system company	30
Business type: Fabricator, Contractor	20
Business type: Architect/Designer	15 (influencer, not buyer)
Business type: Homeowner	0
Requirement ₹10L+	30
Requirement ₹2-10L	20
Requirement ₹50k-2L	10
Timeline: immediately / within 1 month	15
GST number given	10
Company name looks real / verifiable	5
Answered first call	10

A ≥ 60 · B 35-59 · C < 35. Upload A + Won leads monthly as a Lookalike source.

17. Measurement

17.1 KPI stack

Level	Metric	What it tells you
Creative	Hook rate = 3-sec video plays ÷ impressions	Does the first 2 sec stop scrolling? (aim 25%+)
Creative	Hold rate = ThruPlays ÷ 3-sec plays	Is the story interesting?
Creative	CTR (link)	Does the offer interest them? (≥1% decent)
Delivery	CPM	Cost to reach; rising CPM = fatigue or competition
Delivery	Frequency	Fatigue watch
Funnel	Form open → submit rate	Is the form too hard / too easy?
Funnel	CPL (cost per lead)	Basic efficiency
★ Quality	CPQL (cost per qualified A+B lead)	Your main weekly KPI
★ Quality	% A+B leads	Lead quality (aim 25-40%+)
Sales	Lead → sample/quote rate, quote → win rate	Sales team effectiveness
★ Business	CAC = total ad spend ÷ new customers	Real cost of a customer
★ Business	ROAS / revenue per ₹1 spent (first 90 days & 12 months)	Real return

17.2 Unit economics: how much can you pay per customer?

Customer annual value (LTV-1yr) = average monthly order × 12
 Gross margin % = your margin
 Gross profit per customer (1yr) = LTV-1yr × margin
 Max affordable CAC = Gross profit per customer × 30–50%
 Max affordable CPQL = Max CAC × (qualified lead → customer rate)

Example (illustration only):

- Fabricator orders ₹1,00,000/month → ₹12,00,000/yr
- Margin 20% → ₹2,40,000 gross profit/yr
- Willing to spend 30% on acquisition → **Max CAC ≈ ₹72,000**
- If 1 in 8 qualified leads becomes a customer → **Max CPQL ≈ ₹9,000**

So even a ₹500 lead, or a ₹2,000 qualified lead, is **very profitable** if your team converts. **Most businesses under-spend on B2B leads because they look at CPL, not CAC.**

17.3 Ads Manager custom column set (save as "SB B2B")

Campaign name · Delivery · Budget · Amount spent · Impressions · Reach · Frequency · CPM · 3-sec video plays · ThruPlays · Hook rate (custom metric) · CTR (link) · CPC (link) · Leads · Cost per lead · Messaging conversations started · Cost per conversation · Conversion leads / Qualified (if CRM connected) · Cost per qualified lead.

Custom metric: Hook rate = 3-second video plays ÷ Impressions . **Breakdowns to check monthly:** Age, Placement, Region, Time of day (by Delivery → Time).

17.4 Weekly report template (fill every Monday)

Week	Spend	Leads	CPL	A+B leads	CPQL	% A+B	Samples	Quotes	Wins	Revenue (new)	Best ad	Worst ad	Action
W1													

18. Optimization rules

18.1 Daily (10 minutes)

- ☐ Ads delivering? Any rejected ads / payment failures?
- ☐ All new leads contacted within SLA? (This is the most important daily check.)
- ☐ Any ad spending 3× target CPL with 0 leads → pause.

18.2 Weekly (Monday, 45 minutes)

- ☐ Fill weekly report (17.4) with lead quality from CRM.
- ☐ Rank ads by **CPQL** (not CPL).
- ☐ Kill bottom 20–30% of ads; promote winners from testing.
- ☐ Launch 3–5 new creatives in testing.
- ☐ Check frequency & CTR trends for fatigue.
- ☐ Sales review: why did lost leads not convert? Feed insights into new ads.

18.3 Monthly

- ☐ Upload new customer list & qualified-leads list → refresh Lookalikes.
- ☐ Breakdown analysis: age, region, placement. Exclude persistent losers only if data is significant.
- ☐ Review CAC & revenue vs spend → decide budget for next month.
- ☐ Plan next month's shoot (Section 12 shot list).
- ☐ Check Event Match Quality & CRM sync health.

18.4 Automated rules (Ads Manager → Rules)

Rule	Condition	Action
Stop loser	Ad: spent > 3× target CPL AND leads = 0 (lifetime)	Turn off + notify
Stop expensive	Ad: CPL > 2× target over last 7 days AND spent > 3× target	Turn off + notify
Fatigue alert	Ad set: frequency > 4 (last 7 days, prospecting)	Notify
Budget protection	Campaign: daily spend > 1.5× planned	Notify

18.5 Troubleshooting table

Problem	Likely cause	Fix
Many leads, mostly junk/homeowners	Creative too consumer-like; "More volume" form; Audience Network on	B2B creative (warehouse/dispatch/BOQ), Higher intent form, "minimum order" line, exclude AN, conversion-leads optimization
Very few leads, high CPL	Too narrow audience, weak hook, form too long	Go broad, new hooks, remove 1–2 questions
Good leads but no sales	Slow follow-up, weak sales process, price mismatch	SLA, call script, sample kits, review pricing
Phone numbers not reachable	Fake/accidental leads	Higher intent + phone verification, completion message, call within 5 min

Problem	Likely cause	Fix
Performance dropped suddenly	Creative fatigue, budget jump, edits reset learning, competitor spend	New creatives, smaller budget steps, check auction (CPM)
"Learning limited"	Not enough events/week	Consolidate ad sets, increase budget, or optimize higher-funnel event
Ads rejected	Policy (claims, text, before/after)	See Section 20, edit claim, request review

19. Scaling playbook

Only scale when **CPQL and CAC are profitable for 2+ weeks**.

1. **Vertical scaling:** +20% budget every 2–3 days on winning campaign while CPQL stays within target.
 2. **Duplicate & jump:** duplicate the winning ad set at 2–3× budget; keep the original running. Kill whichever underperforms after 7 days.
 3. **Horizontal scaling:**
 - New geographies (state by state, with matching delivery capability).
 - New personas (dealers, architects) with dedicated angles and forms.
 - New lookalike sources (Won customers, A leads, 95% video viewers).
 4. **Creative scaling:** more variations of winning angles; new people on camera; regional languages (Hindi, Gujarati, Marathi, Tamil, etc.).
 5. **Algorithmic scaling:** once CRM feedback is flowing, switch prospecting to **Conversion leads** optimization; test Meta's **Advantage+ leads / automated campaign** options if available in your account, with your best creatives.
 6. **Cost control while scaling:** set a **cost per result goal** a little above your stable CPQL-equivalent CPL.
 7. **Operational scaling:** before doubling ad spend, make sure the **sales team can handle 2× leads** within SLA. More leads + slow follow-up = wasted money.
-

20. Account safety & policy

- **Warm up new ad accounts:** start with modest budgets for the first 1-2 weeks; avoid huge sudden spends.
 - **Don't change payment methods often;** keep a backup card on file.
 - **Verified business + 2FA for all admins.**
 - **Claims:** only use claims you can prove (test numbers, project counts). Avoid "No.1 in India", "100% unbreakable".
 - **Avoid personal-attribute wording** like "Are you broke?"; business-type wording ("Fabricators:", "Builders:") is fine.
 - **No misleading before/after or fake "price slash" countdowns.**
 - **Images:** don't use other brands' logos or copyrighted images.
 - **Comments moderation:** reply to every comment within hours; hide spam; move price questions to WhatsApp ("Bulk price shared on WhatsApp, please message us").
 - **Landing pages/forms:** include business name, address, privacy policy link (required in lead forms; a simple privacy page on your website or a free policy page works).
-

21. Other channels

Meta works best when combined with these.

21.1 Google Search Ads (captures ready buyers)

- **Keywords (phrase/exact):** "window hardware manufacturer", "aluminium window fittings wholesale", "upvc window hardware supplier", "sliding window roller manufacturer", "door hardware distributor [city]", "[product] bulk supplier".
- **Negative keywords:** "price for one", "single", "DIY", "repair", "home depot"-type retail terms, "job", "salary", "free", "second hand", "amazon", "flipkart".
- Send to a **landing page** with a bulk-enquiry form + WhatsApp button; track with conversion tags; import offline conversions (Won) back into Google.
- **Google Business Profile** with products, posts and reviews.

21.2 LinkedIn (targets job titles)

- Organic posts from the founder's profile: dispatch, projects, tests, industry insights (3 per week).
- Connect + message: purchase managers, project heads at builders, architects, window system companies.
- LinkedIn ads only when budget allows (expensive, but precise for procurement heads).

21.3 B2B marketplaces

- IndiaMART / TradeIndia premium listings with full catalog; respond to buy-leads quickly.

21.4 Offline

- Trade exhibitions for doors/windows/fenestration (e.g., ZAK Doors & Windows Expo), builder association events (e.g., CREDAI chapter events), architect association meets.
- **Bring the event to Meta:** retarget event-area audiences; upload collected visiting-card contacts as a Custom Audience after the event.

21.5 Remarketing your existing customers (often the cheapest growth)

- Upload existing customers → run "new range / upgrade / referral" ads.
 - **Referral program:** "Refer a fabricator/builder → [reward] after their first order."
-

22. 90-day roadmap

Days 1-14: Foundation (spend ₹0-5,000)

- ☐ Business Portfolio, verification, 2 admins + 2FA, backup ad account
- ☐ Page + Instagram trust layer (Section 2.2), 12 posts
- ☐ WhatsApp Business (or API provider) with catalog, auto-replies, labels
- ☐ Pixel + CAPI (if website), domain verification
- ☐ CRM/Google Sheet with stages + scoring (Sections 15-16), real-time lead sync
- ☐ Sales assets (Section 2.3) + sample kits
- ☐ Shoot day #1 → 15-20 clips; edit 8-10 ads

Days 15-45: Launch & learn (₹30,000-50,000)

- ☐ Campaign 1 (Prospecting Leads, Higher intent form) with 2 ad sets (Broad + Interest), 4-6 ads
- ☐ Campaign 3 (Testing): 2 new concepts/week
- ☐ Campaign 2 (Retargeting) once video viewers/engagers > ~1,000
- ☐ Daily SLA checks, weekly reports, kill/scale rules
- ☐ Collect first 2-3 testimonials and 1 case study

Days 46-90: Optimize & scale (₹60,000-1,50,000/month)

- ☐ Lookalikes from customers + A leads
- ☐ CRM → Meta stage sync; test Conversion leads optimization
- ☐ ABM campaign for top 50 named accounts + outbound calls
- ☐ Dealer/distributor campaign for 1-2 new states
- ☐ Google Search Ads on high-intent keywords
- ☐ Shoot day #2 and #3; 3-5 new creatives every week
- ☐ Scale winners +20% every 2-3 days while CPQL holds

Targets to aim for by day 90 (set your own after first month)

- CPQL stable and within your affordable range (Section 17.2)
 - 25-40%+ of leads are A/B
 - 5-10 new B2B accounts in trial/regular ordering
 - Clear list of top 3 angles and top 5 creatives
-

23. Templates & checklists

23.1 Pre-launch checklist

- ☐ Ad account currency INR, timezone Asia/Kolkata
- ☐ Payment + backup card added
- ☐ Audience Network excluded
- ☐ Form: Higher intent, qualifying questions, privacy policy link, completion screen with WhatsApp
- ☐ Leads syncing to CRM/Sheet in real time; sales alert working (test with a test lead via Meta's Lead Ads Testing Tool)
- ☐ Naming convention applied
- ☐ UTMs / WhatsApp Ref codes set
- ☐ Each ad: 9:16 + 4:5 versions, captions, hook in 2 sec, one CTA
- ☐ Advantage+ creative enhancements reviewed (product-altering AI off)
- ☐ Exclusions: existing customers, recent leads, employees
- ☐ Sales team briefed: SLA + call script + catalog/profile ready to send

23.2 CRM / Google Sheet columns

Lead ID | Date-time | Source (Form/WA/Google/Event) | Campaign | Ad / Ref code |
Name | Company | Phone | City | Business type | Monthly requirement |
Need (price list/BOQ/sample/dealer) | Timeline | GST | Score | Grade (A/B/C) |
Assigned to | First contact time | Response time (min) | Stage |
Sample sent date | Quote value ₹ | Quote date | Won/Lost | Lost reason |
First order ₹ | Monthly potential ₹ | Next follow-up date | Notes

Stages: New → Contacted → Qualified → Sample sent → Quote sent → Negotiation → Won / Lost / Nurture

23.3 WhatsApp message templates

Instant reply to new lead:

Hi [Name] 🙌 Thank you for contacting SB Enterprise. [Sales person] will call you within 10 minutes. Meanwhile, here's our company profile & catalog: [link] For faster help, reply with your requirement (product + quantity + city).

After call (A lead):

Great speaking with you, [Name]. As discussed: ✅ Sample kit dispatching today to [City] ✅ Quote for [project] by [date] Here's a short video of our warehouse & testing: [link] - [Your name], SB Enterprise, [phone]

Follow-up (no reply):

Hi [Name], just checking: did you get a chance to look at our catalog? If you share your BOQ or monthly requirement, we'll send a best project rate within 24 hrs.

Dealer enquiry:

Thank you for your interest in SB Enterprise distributorship for [City]. Please share: shop/firm name, years in business, current brands you sell, monthly turnover range, and GST no. Our team will call you to discuss margins & territory.

23.4 Monthly creative brief template

Month:
Winning angles last month (by CPQL):
Losing angles:
Top objections heard by sales (use as ad topics):
New products / offers:
Shoot list (10–20 clips):
Hooks to test (5):
Personas to target (fabricator / builder / dealer / architect):
Languages:

23.5 Glossary (quick reference)

Term	Meaning
CBO / Advantage campaign budget	Budget set at campaign level; Meta distributes across ad sets
ABO	Budget set per ad set (used for testing)
Learning phase	Meta's first ~50 optimization events per ad set; results unstable
CAPI	Conversions API: server-side events to Meta
Conversion leads	Optimization using your CRM's lead stages (quality)
Lookalike	Audience similar to a source list (e.g., best customers)
CPQL	Cost per qualified lead
CAC	Customer acquisition cost
Hook rate	% of impressions that watched 3 sec
Frequency	Average times one person saw your ad
CTWA	Click-to-WhatsApp ads
ABM	Account-based marketing: targeting named companies
TOFU/MOFU/BOFU	Top / middle / bottom of funnel

Final word: the 5 things that will give SB Enterprise the most growth

1. **B2B-only creative** (scale, tests, dispatch, projects, founder) + **"bulk/project orders only"** messaging.
2. **Higher-intent lead forms with qualifying questions + lead scoring.**
3. **5-minute follow-up** + sample kits + structured follow-up for 30 days.
4. **Feeding quality data back to Meta** (customer & qualified-lead lookalikes → CRM conversion leads).
5. **3–5 new creatives every week**, judged on **cost per qualified lead and CAC**, not likes or CPL.

Prepared for SB Enterprise. Update this playbook every quarter with your real numbers and learnings.
